

# RMClabel

## RMClabel—User Friendly Label Development Product

### Overview

Crossroads RMC has developed a label generation solution that allows Baan/ERP<sub>LN</sub> users to easily create and implement labels. RMClabel offers significant advantages over using third-party label printing software. Since label information can be unique to a business, item, customer or functional area, RMClabel allows for an easy method to configure exactly what is needed on any type of label, including 1-D barcode, 2-D barcode and RFID labels.

### Benefits

RMClabel provides the following benefits to Baan/ERP<sub>LN</sub> users:

- > Provides an efficient and reliable method of developing label formats and accessing Baan/ERP<sub>LN</sub> information as well as other required data sources.
- > Provides a cost effective method for developing and printing labels without the use of a third-party package.
- > Provides the capability to meet industry, product item specific and/or customer specific labeling requirements.
- > Provides the means to easily customize and enhance labels to meet future business requirements.
- > Reduces the complexity of incorporating label formats with Baan/ERP<sub>LN</sub> and related applications.

### Functionality

The RMClabel solution assists companies in meeting label requirements in a user-friendly manner.

- > Develop and manage standard label formats for different labeling requirements.
- > Manage label printers.
- > Print labels quickly and easily and incorporate into automated bar coding and Baan/ERP<sub>LN</sub> applications.
- > Create barcodes with prefixes.
- > Develop 1-D barcodes, 2-D barcodes and generate RFID tags.

RMClabel contains all the necessary components and capabilities to create labels incorporating lines, graphics, data fields, barcodes, fixed values and defined values.
