

Supplier Portal

Manufacturers can't produce everything themselves. You must rely on suppliers in order to provide the raw materials and subcomponents necessary to produce what you sell. The need to rely on others, can often lead to disruption in the supply chain. Constant communication is necessary to make sure everyone is working off the latest information, and to ensure that customer satisfaction doesn't suffer. This communication has traditionally taken place via phone, email and fax. Crossroads RMC has a better way.

Overview

The Crossroads RMC Supplier Portal extends and automates communication between you and your suppliers via a web portal and provides a seamless integration of people, processes and systems. You can get the right data at the right time to allow full monitoring of expected delivery dates, price changes, tracking information and more.

Features and Functions

- Integrates to all versions of Baan/LN, and Nazdaq's Mail Merge product.
- Share ERP generated documents and review historical and current documents online, including price catalogs and purchase invoices.
- View, update and approve purchase order and shipment information, such as expected delivery date, price changes, and quantity issues.
- Track actual shipments on the floor and print shipping documents.
- Integrates seamlessly to the Crossroads RMC shop floor data collection receiving process. Scan and verify documents upon arrival, generate receipts, labels and routing sheets, to track where parts are needed.
- Get feedback and vendor rating indicators to track your on time deviations on interactive graphs, allowing you to provide more accurate delivery dates, and improve supply chain efficiencies

Crossroads RMC's Supplier Portal expands your workflow, stores your ERP documents and allows you to easily share information with your suppliers, buyers, finance, and any other necessary parties. Optimize your systems today.
